

I am writing with concern for K-LOVE radio broadcast. Please know that the local broadcast of this radio programming is important to communities like ours. It serves as an encouraging family oriented radio station. It gives people another option to listen to than just the regular, sometimes vulgar programming on other stations. If it were replaced by another programming station then it would take alot away from our community. We did once have a regular local station and it was nice to hear local news and other info on the radio. Yet K-LOVE is a great alternative and the local news can still be found in the local newspapers. I believe that the programming that they provide is of interest to the public because the music and info provided on thier stations reaches out to many people and touches thier lives. So please reconsider this matter. Thank so much.
